## Synopsis

Soul Travel is a documentary film.

The theme of the journey, not only physical but also intended as an inner journey, is the common thread that, from Italy, will lead the viewer to discover one of the most spectacular places on Earth: the Kilimanjaro volcano.

The journey represents the means that leads from ignorance to enlightenment; so it will be for the four protagonists, two men and two women, put to the test along the winding road that leads to a fascinating and adventurous destination and which, in the end, will push them to discover themselves.
